

The efficient liquid fertiliser.

Analysis

Total N (w/v)	Total N (w/w)
42.5%	32%

Forms of nitrogen

Urea	Ammonium	Nitrate
50%	25%	25%

Physical and chemical characteristics

Specific Gravity	pH	Salt out temperature	Viscosity	Additives
1.32 kg/L	6 - 7	<0°C	10% more viscous than water	Contains a corrosion inhibitor

Common applications

- Applied with herbicide prior to planting grain and canola crops (confirm herbicide compatibility before application)
- Soil injected at planting in winter and summer crops
- Dribble banded in crops, pastures and sugarcane
- Foliar sprayed in crops and pastures
- Fertigated through irrigation systems, including centre pivots, sprinkler systems and drip lines
- Water run in row crops and pastures

Benefits

Efficient

- EASY N® can be applied in targeted applications to meet crop demand at any growth stage. By being able to split applications throughout the growing season, farmers can better manage crop risk.
- Because it is a concentrated source of nitrogen, tanks don't need to be refilled as often.
- EASY N is less volatile than urea, so volatilisation losses are lower if follow up rain does not occur.
- Being a liquid fertiliser, EASY N can distribute nitrogen more evenly than solid fertilisers.
- It can be applied with selected crop protection products to save time, labour, fuel and other machinery operating costs.

Easy to transfer and store

- Pumps are used to transfer EASY N, so there's no need for manual lifting, augers or forklifts.
- There's no dust or downtime in waiting for solid products to dissolve.
- It can be stored in cost-effective heavy duty poly tanks.
- It does not deteriorate in storage, and can be stored from year to year if required.

Flexible

- EASY N can be fertigated via irrigation equipment, applied using boomsprays with flat fan or streaming nozzles, foliar sprayed, injected into the soil or sprayed on to the soil.
- EASY N is ideal for 'little and often' or split applications to closely match crop nitrogen requirements.
- EASY N can be metered precisely for variable rates.

Supply

Incitec Pivot Limited delivers EASY N in bulk on farm using 26 tonne tankers or 36 tonne B Double tankers. It can also be supplied in 1000 litre containers (IBCs).
